NEW-YORK WEEKLY TRIBUNG A VERY LARGE PAPER, FOR THE COUNTRY BYCSLIPHED EXERT SATURDAY MODELING.
Attaclow once of CVVO DOLLARS per summit, in advance.

THE TRIBUNE

Sprech of Hon. John H. Clayton.

Delivered at the Whig Mass Meeting, held at Desaware Cay (Del.) on Thurs-day, September 26, 1844. hed at Delaware City. Del. on Thurshed City at the contrast between the sate of the contrast between the sate pool to see the sate of all the Whigs who could be assembled at our bennial meeting at this place, scarcely filled two bennial meeting at the filled two bennia whom they had helped to elect to the nighest offices of the nation. In Joly, 18-12, when that meeting assembled on this spot, thousands of la. tant to him than any local politics which usually meeting assembled on this spot, thousands of inrainly seeking employment; our commerce was paralyzed, and the newspapers were, literally, fill d little about party men and party strife, or who is with notices to creditors from hundreds of the most industrious and enterprising of our citizens very clearly, I think that if this system of Promost industrious and enterprising of our citizens seeking relief under the insolvent bankrupt laws of the country. Public securities of every description were discredited; the National Government groaned under an enormous weight of debt; Prezeury was exhausted; specie was constantly passing from us to foreign countries; and our credit abread was utterly prostrated. The exchanges of the nation were entirely deranged; industry met with no adequate reward; and the ery for relief from our distressed countrymen was sent up from every section of the Union to the first Whig Congress that ever assembled in the Capitol. At the same time, our political oppodestructive dectrines about Free and Hard Money had reduced us to this state of distress, had invented and propagated a story, which could have originated only with a genuine Lieo. Foco, that the Whigs in 1840 had promised the laborer, in the event of their success, two dollars a day and roast beef; and they continued to propagate this petty falsehous of their own device, until many a one among them actually believed it-

. Who having unto truth, by telling of it. Nace such a singer of his memory. As credit his own ise.

So that, during the general gloom and distress of the period I have described, our opponents repiced in the opportunity of taunting us with the question - "Where now are your two dollars a day and roast beef?"

At the same time the measures proposed for the relief of the country by the Whigs in Congress, had been defeated by the treacherous course of the Acting President, and the steady, persevering efforts of a recaless opposition, which labored without ceasing to baffle or embarrass every Whig effort for the good of the people. But the harvest was over, and the summer was just end ed, when the patriotic Wing Congress of 1842, to the acep disappointment of their enemics, succeeded, amidst unexampled emberrassments and difficulties, in parsing the glorious Whig Pariff many a poor Whig from want, but enabled many a Loco. Foco to cara two dollars a day and eat roast beet, who at that time, as he wandered about the country for want of employment, waved his rag

ged has in scornful triumph over what he called the viclated promises of "these rescally Whigs." a single manufactory about sixty miles from Boston which gives a livelihood to the fancy cutters is still higher. I understand they can earn nearly three dollars a day, and eat roast beef. There are many glass factories, perhaps of equal dimensions. In the standard of the English laborers, under various shapes and forms, amounted in a single year to the production of the common factories. There are many glass factories, perhaps of equal dimensions. parts of the United States; and the laborers in these factories consume breadstuffs and agricul-tural produce raised by the farmers of the Middle and Western States, for which they assist in sup plying us with glass. It is stated that the same of the Sandwich Works is brought from Maunee River, New Jersey; the coal to heat the furnaces, &c. from Virginia, seven hundred miles distant; and the straw for packing the glass from the State of New-York. Take off the duties on glass were, and establishments of this description, numerous as they are in our country, will cease to furnish the means of profitable employment to thousands who now help to constitute a home market for us; and we compel them to compete with us in agricultural labor, thus increasing the supply and diminishing the demand for our produce. In that case, they may get roast beef enough; but where the two dollars a day are to come from I can not understand. I hold in my hand certain published statistics of the Lowell manufact tures, as they stood on the 1st of January last, which, I am assured, are compiled from authente sources. Eleven manufacturing companies at this place employ a capital of \$10,650,000, and 6295 females, making in all 8,640 operatives. They make 71,141,600 yards of cloth per annum, and consume 22,880,000 lbs. of cotton. The average amount of wages in these estab. ments paid per month is \$150,000; and they annually consume 4,000 barrels of flour for starch in their mills, print-works and bleachery, pay him the English excise, or direct tax, on to say nothing of the amount of flour consume by the operatives in bread. They consume in these factories, annually, 12,500 tons of anthraete cost, 3,290 cords of wood, 67,849 gallons of all, 800,000 lbs of starch, and 600,000 bushels of chargoal. Observe that I am not attempt. ing to give the statistics of all the factohits at Lowell, but only a part of them. The

water preofing establishments, the powder mills,

the Lowell Bleachery, a flannel-mill, blanket-

will, batting mill, paper mill, card and whip fac-

tory, planing machine, reed machine, a foundry,

with grist and saw-mills, are not included in

these statistics. But I wish the farmers of Deltware, Pennsylvania and New Jersey, this day

assembled here, to distinctly understand how

that home market is created and maintained,

without which their agricultural labor could not possibly meet with any adequate reward. Let

me be still more particular about this matter -One of these eleven establishments, the Middle-

Mille, now consumes the fleeces of 1,200

theep daily, as a friend informs me, who has with in a few days returned from the spot. Farmers!

here, then, is a single establishment which sup-

Mies you with an annual market for the fleeces

BY GREELEY & McELRATH. OFFICE NO. 160 NASSAU-STREET.

NEW-YORK, MONDAY MORNING, SEPTEMBER 30, 1844.

take off the duties which protect American wool weeks ago, at which a large sum of money was to the Democracy by the men in whom they and woollens, and American cotton goods, by re-pealing the Whig Tariff of 1842, and how will with free trade publications, to be printed in confidence generously bestowed, should have matters stand then? In that case, if these estab. New York! This will, of course, instruct Broth-lishments could continue their operations, they er Jonathan how wise we would be to have Britagain have we protested against the anti-Demowould buy their wool from foreign countries; and | ish goods duty free, and break up what the Engyou and your sheep night go to grass together, lish tories call our American system of monopo-before you could find a market for your wool. lies and commercial restrictions. would be impossible for these estabhishmen's to continue their operations; and you would not only cease to feed the operatives engaged in these manufactories, but you must excounter the competition of a great many of which I beseech you to investigate for yourselves them, who, in the absence of all other employment, most go to farming to get bread. And the number of farmers and ploughmen being increased and tobacco, has been estimated by competent emerged from the swadding clothes of Democra-

tecting Home Labor, this plan of encouraging Domestic Manufactures, or, in other words, this

Tariff of 1842, shall be overthrown-no matter

who may be among the ins, he will probably be

among the outs; by which I mean, that, if he does not expect to become an office holder, but

still to depend upon the plow, he will probably soon be out of cash, out of credit, and if not out

of character, it may be very probable he will soon

ment of a system of Free Trade, I ask to be in-

delged while I briefly point out how, by the aboli-

tion of our own Tariff, we shall become virtual

tax-payers, supporting to the full extent of our

Britain, with all her monarchical and aristocratic

institutions. The whole annual expenditure for the support of Government in that kingdom, in-

cluding the interest on the public debt, exceeds

£50,000,000; being about \$250,000,000, annu-

ally levied to sustain British institutions, includ-

ing her corrupt pension system and those result-

State. To effect this, England, while she preaches

Free Trade to us, levies enormous duties upon nearly every article we can produce, except raw

consumed at home-to an amount which, Mc.

which, you know, is the common drink of the la boring classes in England. In the first instance,

to a farther excise duty, the joint proceeds of

000. So that, it appears from the statistics of McColloch, the excise levied on the common

cessary for the laboring classes, too tedious to mention. Beside all these, and to say nothing

of the land-tax, there are taxes on all the win

dows of the poor man's house, beside a tax on the house itself, a tax on the man, a tax on his

horse, a tax on his cart, a tax on his dog, a tax

on the deed for his land, if he owns any,-a tax

on his receipts,-a tax on his will, and (I under-

If you are resolved that English laborers shall

manufacture your goods, and to that end are de-termined to break down your own manufactur.

ers, who alone could keep down the price of English goods by their competition, you must, of

course, expect to pay the English laborer such a

price for his goods as will enable him to live, and live in England. Of course you must pay him for his work, enough to enable him to pay ALL

HIS EXCISES AND STAMP DUTIES. You must pay

for you; you must pay him his window tax, which lets in the light of heaven to enable him to

see how to do the work; and, in short, you must

every article of food or clothing which is subject

to such a duty, and also on every taxed article

him for the beer he drinks while he is worki

stand,) a tax on his coffin.

ability to consume British manufactured goods, he monstrous and corrupt Government of Great

Without going into a general discussion of the benefits flowing from the Protective Policy, or of the evils which would result from the establishment of From the establishmen are preferred to it for horse food. The whole resigned my seat in that body in December, 1836, equal to one half the corn crop of little Delaware itself!

trade of certain political newspapers and orators who assail Whig members of Congress for voting Farmers! the interests of yourselves and your country are now in your hands. You will decide its destiny and your own, by your votes in November. If you are not satisfied with the prices furnished by your own Home Market, you may try Free Trade; and if that does not leave your surplus bread stuffs to rot on your hands, there is no truth in political arithmetic. The only alternative L know of for you in to give a not satisfied with a revenue duty of 5 per cent. ad valorem, when costing not more than 7 cents per pound. This is represented as a Whig vote against protection to wool. This coarse wool is brought from South America, and is used in the manufacture of car.

ing from the connexion between Church and There are two falsehoods current with the enemies of the Tariff, which, though often refuted, it is necessary again to expose. The first of these is, that the Whigs are in favor of prohibitory duties. Mr. Clay has over and over again, in all his making a species resudiated a graphitum. pole in the country. cotton, by a tariff said to average more than 380 per cent. And she also levies excise duties,—that is, taxes on such artices as are produced and ties. Mr. Clay has over and over again, in all his public speeches, repudiated a prohibitory Tariff. If there be a Whig in the nation who is in favor of duties amounting to prohibition on foreign articles, I do not know him. The second misrepresentation is, that James K. Polk is in favor of our Protective Policy. This is now known by all who circulate it to be a falsehood, and shown will some overtake all who have some that Culloch states, exceeded, in each of the years 1833 and 1834, £18,000,000, or about £90,000, 000 annually. To illustrate the effect of this ex-cise system, I will take the single article of heer, falsehood utterance. I now hold up to your view, and invite your attention to, a nowspaper called the "Pennsylvania Statesman," published at Carlisle on the 19th of this month. You see, it the hogs to make the beer are subjected to an excise duty which, in the year 1831, produced a revenue of £330,000. Next, there is an excise duty on mait from bariey, which, in the same year, 1834, amounted to the enormous sum of £5.142,is a Democratic paper, and has the names of stands unshaken and unshoved amidst the tem-000, and on malt from other grain, £134 000; naking together, £5.276,000. Then the brewers Polk, Dallas, and Shunk, in staring capitals, at pest of calumny, which rages around him, and the head of its columns. It contains the Pro. | will come forth unburt by all the peltings of this and malsters are subject to other excise duties, and the sellers and retailers of the beer are subject which amounted, in 1834, to the sum of £328. their letter had been received from Mr. Polk, after the lapse of five weeks. They then proceed by resolutions, to denounce Mr. Polk as unwor-thy of support. After this follows an Address to the amount of all these excises on hops, malt and licenses to brewers and sellers of beer, in the year 1836, at more than \$30,000,000. Nearly all the necessaries of life are subject to a similar excise. This excise tax on soap and soap-makers in the year 1836, amounted to nearly \$5,000,000 aware. Would to God that men of all parties There are exci-es on vinegur, on tea and coffee, might prove themselves as honest, as manly, as glass, starch, paper of every class, tobacco and snuff, bricks, and a long list of other articles ne. intelligent, as independent and as fearless as these

Tariff Democrats of Cumberland County! They have shown that " All the ends they aimed at were their country's ;" and it would give me indescribable gratification to know them and take them by the hand. But should I ever see them, I will tell them that, proud as their position now is, and justly as Pennsylvania may boast of such citizens, there are some among the Blue Hen's Chickens with your attention to two of my friends and neighbors here present, members of the Delaware bar, and both of them gentlemen of the most distinguished private worth, who have avowed the Delaware, now determine

"With all their might
To stand by the right
Of our gallant Clay of Kentucky!"

But the matter to which I desire specially to direct the attention of all present, and particular. ly of all modern Democrats, is the leading ed. torial of this Polk and Dallas "Pennsylvania which he uses in the manufacture of the goods vou consume. In doing this, you support the British Government, Queen, Nobles, Church, the Dickinson meeting, and denouncing the in-British Government, Queen, Nobles, Church, Army, Navy and all, as fully as any Englishman township drill sergeants and whippers in of the who consumes no more of their manufactured goods than you do; and you find employment K. Polk, and the Democratic party under its preor, and support English subjects, to be taxed by sent organization, as being in favor of the Prothe English Government. A late able writer es- tive Principle. The Editor says, "tens of thoutimates" that we pay an average of about 50 per sands of the honest Domocracy of Pennsylva cent, of the cost of imported articles of manufac. nia are at this moment cherishing this same falture into the Exchequers of foreign and despotic lacy" (that is, the idea that the Tariff of 1842 governments, as a TAX used to oppress and injure ourselves." Every time Queen Victoria pro- was a Democratic principle;) and when they duces a young prince, a young duke, or a dar. come to be convinced that James K. Polk is opling little princess, you will have the satisfaction posed to the doctrines of 'Protection,' like the to know that you are expected to send a little men of Dickinson they will desert him, because more grist to the English mill, another contribution to support the dear babies, which must each soon have salaries and pensions of some hundred

Mr. Polk's HOSTILITY TO PROTECTION thousand pounds sterling a year. What a de as an abandonment of Democratic principles lightful thing it will be for our modern Demo. This is one of the bitter and blasting cracy to learn, after they shall have broken down the DECEPTIVE AND FRAUDULENT the system which now enables their own coun. COURSE pursued by the so-called Democratic trymen to furnish them with their own clothing, that Prince Albert, like John Rogers, of red-hot memory, has at last "nine small children and PHISTRY AND FALSEHOOD, which with memory, has at last "nine small children and control for the solitary exception that we know of, has been recorded to by the TRAVELING ORAthe size of extending the standard extended to the solitary exception that we know of, has been recorded to by the TRAVELING ORAthe size of extending the standard extended to the solitary exception that we know of, has been recorded to by the TRAVELING ORAthe size of extending the standard extended to the standard extended to

cratic course pursued by the presses, orators and My fellow-citizens, the value of our own Home and the dangers of their course. WE HAVE

met your attention for a few moments, while I take to be the charity of foreigners, for I appresent with the past. At that time take to be the charity of foreigners, for I appresent with the past. At that time them free trade, as we substantially did in the editorials of their own party organ, the Pennsylhend their own countrymen, in such a state of vear before the passage of the Whig Tariff of vania Statesman.' I will not assume the task of

ware. Few in number as they were, the mere manufactories and the mechanic arts at this time manufactories and the mechanic arts at this time get from Free Trade, when we shall have been at a million, (there were nearly eight hundred thousand four years ago.) and the whole capital mount the misortunes of their country, resulting mount the misortunes of their country, resulting mount the misortunes of their country, resulting mount the discovered that directly observes the time get from Free Trade, when we shall have been persuaded by British capitalists to destroy our own. Home Market which consumed annually specially s mourn the misjortunes of their country, resulting from the death of one and the treachety of another from the death of one and the treachety of another will by this time begin to see that here is some-It has been shown that New-England alone con. I delivered at Wilmington on the subject of the sumes, in flour, 7,000,000 bushels of wheat annu. Tariff. By one writer I was assailed because I ally beyond her own production; which is 500,000 had not represented Mr. Poik as a friend of the bushels more than the average annual export of the whole country. "It is stated on good authority," says Mr. Ellsworth, Commissioner of Pa. a Protective Terriff, and he consured the Whig tents, in his last Annual Report, p. 41, "that the party, and especially Mr. Clav. for passing the Manufacturers of New England, in 1842, used more than 200,000 barrels of flour in making starch and sizing their goods; being a larger quantity than was exported to England in the same period." England never did, and never the United States Senate against the Tariff acts will, buy our Indian corn. In the only condition both of 1824 and 1842, though the assailants probably in which it will bear exportation (kiln-dried) it is deemed by Englishmen unfit for bread, after it went into the Senate of the United States will soon has undergone transportation; and English oats alternative I know of for you, is to give up your occupation, and let your fields grow up in filthy this kind is not produced by our farmers; yet it weeds; and then our good Democrats will have is necessarily used, with ours, in these manufacpoke-bushes enough to hang upon every hickory. tures; and without it our own wool could not be successfully used in the construction of these fab.

shame will soon overtake all who have given that sentations of the day. Do not be alarmed by the

ceedings of the Democratic Tariff Meeting in Dickinson township, Cumberland County, on the At this very time, four years ago, our lamented 31st of August last. There proceedings set forth Harrison was the object of assault from the same a copy of a letter addressed on the 22d of July by a Committee appointed at a previous meeting, to James K. Polk, inquiring of him whether he sold white men for debt,—that he was an old was in favor of the Tariff, and whether, if elect. coward, a petticoat general,-that he was not in ed, ne would support it? Then follows the Re. the battle of the Thames, and was a traitor to his port of the Committee, stating that no reply to trust; indeed, there were few crimes enumerated You, probably, all recoilect how, in that day, we were tauntingly told that the Whigs deserved to be beaten for running an "old granny" for the the Democrats of Cumberland, conclusively show. Presidential office, while we had a Statesman ing that Mr. Polk is opposed to the Protective Principle and the true principles of the Tariff ated, and that we had defeated our only chance Democrats of Pennsylvania. To all of this I in. of success, by the omission to nominate that able vite the attention of the Tariff Democrats of Del. and distinguished statesman. But Harrison has been taken from among us ;---

Duncan is in his grave;
After life's fittal fever he sleeps well:
Treason has done his worst; nor steel, nor poison,
Malice domestic, foreign levy, nothing
Can touch aim further;

And now, the same envenomed shafts which may have had an agency in bringing his grey hairs in sorrow to the grave, are aimed, with the same intentions, at the very man of whom it was then admitted, and proudly boasted, HE would have done honor to the Presidenrial office! The great Statesman of the West has been the object of unceasing calumny during twenty years, for hearts as firm and true. Without alluding to one of the best acts of his life. The sequel of his the many in Delaware who have followed their history, which shall announce the triumph that example, I rejoice with exceeding joy in pointing awaits him, while it will prove a salutary lesson to calumniators in all time to come, will present one of the proudest of all human victorics over unmerited persecution; For, lo, the day and hour of Cumberland County, and, although heretofore he has passed; but brighter and more glorious by among the champions of Democracy here in that fiery trial will he stand amidst the blaze of

his mighty and unexampled triumph. TRIBUNE BOOK BINDERY. No. 7 SPRUCE STREET,

the attention of the public to the unpraiseled improvement and decided advantages these Clocks have over all other time keepers now in use. They are warranted to run one year with once winding, and to keep rood time, and are now for sale at 169 Fulton street. New York.

The metion is produced by weights is the 30 day clocks, and by a main spring wound upon a fusee in the year clock. The power of the weight or spring is retarded in this clock, and made to retain regularity in its motion by the ingenious arrangement of the escapement and gendulum. When you look at the clock, you preceive a gilt ball four and a half inches in diameter, at the end of a small steel rod. If revolves three times and a naif one way, and the same number of times the other. At the upper end of the rod is an ingenious and deleast double lever movement, reaching to the econjement, which it catches and leaves without any sensite friction. The spring them reacts upon the ball, aided by its own gravity, and necessary motion is continued, the escapement controlling the bendulum as in other clocks. The shall is hollow and mis an internal apparatus, by which its reary motion is regulated. There are four small weights at right affects he each other, two are mounted upon a wire, which is a horizontal diameter of the globe. The other two weights are fastened to a semi-circuit hand composed of three different ne tals, the contraction of time. The other two weights are fastened to a semi-circuit hand composed of three different ne tals, the contraction or expansion of which also changes their position within the ball. The who ener or arrangement insures, it is believed, entire unformity of motion in the globe.

of which also change their parison wants to early the wine insert or arrangement insures, it is believed, entire uniformity of motion in the glube.

It will stonce be seen that the friction of the common rendu lum is avoided. The revolutions of the ball are found by experiment and observation to be iscertoped.

This clock is not put out of heat enally—it requires no oil on

This clock is not put out of heat early—it recities no off of the pallets.

The revolutions of the swing wheel are 60 times less, or in other words, is 60 years in making as imany revolutions as the 50 inch or second pendulum clock does in one year. In fact a weight of 7 pounds keeps in motion each part of the time and striking machinery for 54 weeks.

The hours are struck by means of a rotary hammer. The certificates of the American Institute show that in May, 1341, it has performed in all respects as was expected.

The process are moderate. The public are invited to call and examine for the unselves.

CALLENANGES PATENT PLATFORM SCALES.—The
